Summary

Final year Computer Science and Engineering student with expertise in backend development using Django/DRF, aspiring to contribute to innovative full-stack and AI-driven projects in a collaborative environment.

Education

BE Computer Science and Engineering

Karpagam Academy of Higher Education

Sep 2022 – Present

Coimbatore, India

Experience

AI Researcher Intern

National Chung Cheng University

Aug 2025 – Oct 2025

Chiayi, Taiwan

- Contributed to an AI research project focused on bipolar disorder prediction.
- Collected and prepared JSON datasets for analysis using the Reddit API.
- Trained, tuned, and evaluated diverse supervised and unsupervised models to identify the highest-accuracy prediction method.

Freelance Full Stack Developer

Self-Employed

2024 – Present

Coimbatore, India

- Developed and deployed multiple full-stack and AI/ML projects, demonstrating proficiency in backend development and ML integration.

Projects

Disaster Aggregation Software | GPT-2, Vicuna AI, BLIP-ICM

- Aggregates disaster-related data from social media and news portals, processes it using LLMs and image captioning models, and presents it on a dashboard for quick response.
- GitHub: BLIP-ICM

Medical Image Report Generation | BERT, PyTorch, OpenCV

- Generates reports for bone fracture X-ray scans using image analysis and NLP models.

Voice-Based Personal Mobile Agent | Python, React Native, WebSocket, Whisper ASR

- Developing a real-time AI-powered voice assistant with streaming speech-to-text, intent detection, task automation, cloud-local sync, and modern UI for productivity and task management (Ongoing).
- GitHub: Voice-Agent

References Off | Next.js, Spring Boot, PostgreSQL, OAuth 2.0

- Built a full-stack academic collaboration platform (referencesof.com) with Spring Boot 3.4.1 REST API, Next.js frontend, multi-provider OAuth authentication, researcher profiles, social networking, personalized feed, role-based admin panel, and production-grade CI/CD pipeline with Docker, Nginx, and Watchtower.

Hacklyn | Next.js 16, Django REST Framework, PostgreSQL

- Developed a full-stack hackathon and event management platform with 40+ API endpoints, multi-role dashboards, OAuth 2.0 authentication, team formation, event lifecycle management, judging system, and a customized Django Admin panel with analytics.
- Live: hacklyn.vercel.app | GitHub: hacklyn

E-Commerce Web Site | DRF, Next JS, PostgreSQL, Razorpay, Shiprocket

- Developed an e-commerce platform for a clothing company with payment integration and shipping management.
- GitHub: Renz-Trending

Academic Course Management System | DRF, Next JS (TypeScript), Django, React JS

- Developed a comprehensive platform enabling college students to select courses and access course materials through an LMS interface where teachers can upload course videos and manage student enrollment.
- GitHub: CBCS | EduConnect

Skills

Programming Languages: Python, Java, C/C++, JavaScript

Frameworks & Libraries: Django/DRF, Spring Boot, FastAPI, React JS, React Native, Next JS, Express JS, Axios, Tailwind CSS, OpenPyXL, Pandas, Numpy

Databases: PostgreSQL, MySQL, SQLite3, MongoDB

AI/ML: PyTorch, OpenCV, NLTK, TensorFlow

Tools & Platforms: Git/GitHub, VS Code, Google Colab, Ngrok, Vercel, AWS, Digital Ocean, Arch Linux, Reddit API

Certifications

AI Using Microcontrollers – CECRI

AI Primer Certification – Infosys

Introduction To GenAI by Google – Coursera

Introduction To Deep Learning – Infosys

Elite Certification In C Programming – NPTEL

Awards

HackTheFuture (Earth Edition): Secured 3rd place in Edu Tech theme (LMS with GenAI)

Dell-AI-thon: Secured 3rd place for an innovative AI solution

TechSonance'23, PSGCAS: Won 3rd prize in a problem-solving Event

HIFOCUS'25, HIT: Won 1st place in Code Debugging Event
